

LOWE HARDWARE

HOW TO CARE FOR YOUR HARDWARE FINISHES

Our products are finished by hand using both traditional and innovative methods and materials. Some of these finishes are considered living finishes and therefore change over time with exposure to the elements and use. We suggest the following methods to care for your hardware:

First, do not scrub any finish with abrasive cleansers or cloths. We recommend using soft microfiber cloths and our favorite metal polish brand is Town Talk Polish Co.

For the following finishes we recommend Town Talk Brass & Copper Polish or Brasso:

Unlacquered Polished Brass, Unlacquered Satin Brass,
Bright Copper

For the following finishes we recommend Turtle Wax Chrome Polish, Town Talk Tap Cleaner, or Windex:

Polished Nickel and Polished Chrome

For the following finishes we recommend Town Talk Silver or Gold Soft Polishing Cloths. You may also use any commercial silver polish on Polished Silver.

Polished Gold, Satin Gold, Polished Silver

The following finishes can be waxed with Butcher's Wax and lightly buffed with a soft cloth:

Light, Medium & Dark Antique Brass
Unlacquered Burnished Brass
Oil Rubbed Bronze
Antiqued Silvers & Pewters
Satin & Burnished Nickel
Any custom antiqued or patinated finish
