

LOWE HARDWARE

No. 1080

---

DRAWER BOX MOUNT LATCH

*Based on the popular #1002 rim latch, the #1080 drawer latch incorporates a 1/4" diameter rod as a latching tongue. This can be cut to length depending on the drawer height. The guide bracket for the tongue mounts to the inner side of the drawer box, resulting in a sturdiness fitting of quality yacht interiors. Strikeplates are made based on joinery detail.*

*Available in any of our yacht quality finishes.*
