

LOWE HARDWARE

No. 200

---

EUROPEAN FULL MORTISE LOCKSETS

*Based on our yachting background, Lowe Hardware is adept in all aspects of European locksets. They have been the lock of choice for all high end luxury vessels based on the ease in obtaining locks made of premium marine grade materials. They are typically set up for use with levers and through bolting of trim (either roses or escutcheon plates). Key locking, privacy, and passage locksets are specified by our project managers based on interior door schedules, and all of our ancillary products for these locks are manufactured in our Rockland, Maine factory.*
