

LOWE HARDWARE

No. 4000

---

*Drawn Half Size*

*Truly innovative, Lowe Hardware's #4000 pocket door latchset is designed to be minimal in detail yet play to the basic ergonomics of one sliding open a panel. Operation is as simple as the swipe of the hand on the concave lever. The combination of trim and latchset in one piece minimizes the overall component count. Installation is elementary based on accurate repeated CNC manufacturing of the components. Privacy versions are available, and any of our yacht quality finishes is available.*
