LOWE HARDWARE

# No. 5029

*The #5029 knob is Lowe Hardware's refined and improved take on a classic design. Our approach leads to a multi piece product which allows for split finishes between the slightly domed face and body. Common finish pairings are bright gold for the face and brushed gold for the body. Beaded, rope, and straight knurls are available as well as a plain smooth ribbon for both the knob and rose. Pictured with our #4710 rose and straight knurl. Available in any of our yacht quality electroplated or patinated finishes.*
