LOWE HARDWARE

No. 5000-T

From a design standpoint "T" handle knobs (while not exactly knobs) lies between the lever and the round and oval knob. "T" handles provide a little better leverage than a knob but achieves it in a symmetrically balanced design. This knob is scaleable to fit a range of applications from large door to small drawer. With kitchens and bathrooms in mind, the knob was designed as a companion piece to the 5000 towel bar.

Available in all of our yacht quality finishes.
